## bin odour freshener

absorbs smells  
and provides  
a fresh  
fragrance

500 g e

### HG bin odour freshener

- absorbs smells and provides a fresh fragrance
- also for waste buckets, waste containers and wheelie bins
- for indoors and outdoors

Rubbish bins, but also waste buckets, waste containers, wheelie bins, and nappy bins can really start to smell, particularly because of rotting vegetable, fruit, meat or fish waste and dirty nappies. *HG bin odour freshener* absorbs this smell effectively and produces a fresh fragrance.

#### Directions for use:

Pour the amount noted below in the empty waste bucket, bin or wheelie bin:

#### Rubbish/nappy bin:

10 - 20 gram (1 - 2 caps)

#### Rubbish bin:

20 - 30 gram (2 - 3 caps)

#### Wheelie bin:

30 - 50 gram (3 - 5 caps)

Depending on the amount of waste, the time the waste stays in the bin and the temperature (quicker in summer), the product may lose its strength. In that case add another dose on top of the waste.
